Centre for Collaborative Learning for Sustainable Development – CCL

- CCL is a research and learning Centre based at Inland Norway University of Applied Sciences (Faculty of Education, Hamar, Norway).
- The Centre holds the UNESCO Chair on Education for Sustainable Lifestyles and coordinates the international PERL partners network.
- CCL aims to contribute to national and international projects on Education for Sustainable Development and to strengthen partnerships on this topic.
CCL Background

• INN University has over 20 years experience in coordinating international research collaboration on consumer education and education for sustainable living.

• INN University led the EU research networks: the Consumer Citizenship Network (CCN, 2003-2009) and the Partnership for Education and Research about Responsible Living (PERL, 2009-2015).

• PERL partners include 140 institutions in 50 countries around the world.

• In 2015, INN University was awarded the UNESCO Chair on Education for Sustainable Lifestyles based on this experience, and in 2016 the University established the Centre as a continued basis for this work.
Activities at CCL

Research and Concept Development

Policy Evolution
